How and where to measure

Please complete the measurements on the next page. Use the following diagrams to assist you in the way the measurements should be taken. We suggest that you do not take measurements of yourself, but rather to get someone else as own measurements tend to be incorrect. Should you require any further assistance, please phone our office or e-mail us for help!

- | | | |
|--|--|--|
| <p>19 Lift knee and measure width just above knee</p> | <p>20 Measure from waist to thigh (standing). Hold the tape on thigh. Squat down and then take measure on knee cap.</p> | <p>21 Best measured on Jeans Pants which fits the person rather tight</p> |
